

to whom it may concern:I would STRONGLY encourage you to reject the NAB's petition #04-160. By voting for this proposal, you are doing a disservice to the XM satellite listeners. Many people, like myself, who travel and are in their cars a lot, depend on XM's weather programming in different markets. This is critical in areas like Michigan and Ohio during bad weather (as we have been having over the last month or so). Common sense should prevail in this issue.

PLEASE VOTE AGAINST NAB PETITION #04-160!!!!!!!!!!!!!!

Respectfully

Chris Hawley
